

With regards to K-LOVE, the FM Christian radio station, I believe it serves my area of West Texas well. I know that many people in my community and surrounding communities listen to K-LOVE on a daily basis. This particular station, being nationwide allows me to hear what others with similar views as mine and my family are thinking. If this station were replaced by an LPFM station, myself and others would lose this unique setting. This country was founded on people seeking a place to practice their religious beliefs as they wanted. If the FCC changes to an LPFM and K-LOVE cannot broadcast nationally, this will negatively impact my religious freedom.
